

ZERO POINT AND SCHUMANN RESONANCE

Thank you Gregg Braden

The Shift of the Ages has already begun!

Ancient prophecies predicted it. Indigenous traditions honor it. Changes within the Earth are affecting your sleep patterns, relationships, the ability to regulate your immune system and your perception of time. You are living a process of initiation that was demonstrated over 2,000 years ago, preparing you to accept tremendous change within your body.

That change is happening now.

- * Migraine headaches, tiredness
 - * Electrical sensations in the limbs and spinal column
 - * Cramps in the muscular networks
 - * Flu like symptoms
 - * Intense dreams.
- These could all be caused by the changes taking place on Earth now!
- * The human body will become more sensitive as a result of the new vibrations.
 - * The resonance of Earth (Schumann Resonance) has been 7.8Hz for thousands of years. Since 1980 it has risen to over 12Hz. This means that 16 hours now equate to a 24 hour day. Time is speeding up!
 - * The physical body has already begun to change. A new light body is being created.
 - * Our DNA is being re-programmed from the Universe (as predicted in the Mayan Prophecy). We are going from 2 strand back to 12 strand DNA.
 - * Greater intuitive and healing abilities will emerge. Each year these will increase 10 fold.
 - * Eyes will become catlike in order to adjust to the new atmosphere and light.
 - * All children born after 1998 will probably be telepathic at birth.

Geophysical Condition

Earth's Rising Base Frequency: Earth's background base frequency, or "heartbeat," (called Schumann Resonance, or SR) is rising dramatically. Though it varies among geographical regions, for decades the overall measurement was 7.8 cycles per second. This was once thought to be a constant; global military communications developed on this frequency.

Recent reports set the rate at over 11 cycles, and climbing. Science doesn't know why, or what to make of it.

What is a Schumann Resonance?

Believe it or not, the Earth behaves like an enormous electric circuit. The atmosphere is actually a weak conductor and if there were no sources of charge, its existing electric charge would diffuse away in about 10 minutes. There is a 'cavity' defined by the surface of the Earth and the inner edge of the ionosphere 55 kilometers up. At any moment, the total charge residing in this cavity is 500,000 Coulombs. There is a vertical current flow between the ground and the ionosphere of $1 - 3 \times 10^{12}$ Amperes per square meter. The resistance of the atmosphere is 200 Ohms.

The voltage potential is 200,000 Volts. There are about 1000 lightning storms at any given moment worldwide. Each produces .5 to 1 Ampere and these collectively account for the measured current flow in the Earth's 'electromagnetic' cavity.

The Schumann Resonances are quasi standing wave electromagnetic waves that exist in this cavity. Like waves on a spring, they are not present all the time, but have to be 'excited' to be observed.

They are not caused by anything internal to the Earth, its crust or its core. They seem to be related to electrical activity in the atmosphere, particularly during times of intense lightning activity. They occur at several frequencies between 6 and 50 cycles per second; specifically 7.8, 14, 20, 26, 33, 39 and 45 Hertz, with a daily variation of about +/- 0.5 Hertz.

So long as the properties of Earth's electromagnetic cavity remains about the same, these frequencies remain the same. Presumably there is some change due to the solar sunspot cycle as the Earth's ionosphere changes in response to the 11-year cycle of solar activity. Schumann resonances are most easily seen between 2000 and 2200 UT.

Given that the earth's atmosphere carries a charge, a current and a voltage, it is not surprising to find such electromagnetic waves. The resonant properties of this terrestrial cavity were first predicted by the German physicist W. O. Schumann between 1952 and 1957, and first detected by Schumann and Konig in 1954. The first spectral representation of this phenomenon was prepared by Balser and Wagner in 1960. Much of the research in the last 20 years has been conducted by the Department of the Navy who investigate Extremely Low Frequency communication with submarines.

For more information, see: "Handbook of Atmospheric Electrodynamics, vol. I", by Hans Volland, 1995 published by the CRC Press. Chapter 11 is entirely on Schumann Resonances and is written by Davis Campbell at the Geophysical Institute, University of Alaska, Fairbanks AK, 99775. There is also a history of this research and an extensive bibliography. POSSIBLE OUTCOMES

1. Time will appear to speed up as we approach Zero Point. A 24 hour day will seem to about 16 hours or less. Remember the Schumann Resonance (or "heart beat" of Mother Earth) has been 7.8 cycles for thousands of years, but has been rising since 1980. It is at about 12 cycles at present. It stops at 13 cycles.
2. Zero Point or the Shift of the Ages has been predicted by ancient peoples for thousands of years. There have been many shifts including the one that always occurs every 13,000 years at each half of the 26,000 year, Precession of the Equinox.
3. Zero Point or a flip of the magnetic poles will probably happen, within the next few years. It could possibly sychronize with the

Earth's four cycle biorhythm that occurs every 20 years on the 12th of August. The next occurrence is 12th August 2003. The Philadelphia Experiment and Montauk Project (secret military time travelling) both locked up to the 12th August/20 year biorhythm.

4. It is said that after Zero Point the Sun will rise in the west and set in the east, approx. Past occurrence of this change have been found in ancient records.

5. Interestingly, the New World Order plan to be in power by 2003. This may or may not happen, depending on many factors and agendas. Stay centered and follow your intuition.

6. The Zero Point flip will probably introduce us to the 4th dimension. Here, everything we think or desire will instantly manifest. This includes love and fear. Our INTENTION will be of utmost importance.

7. Most technology that we know will cease to operate. Possible exceptions could be technology based on so called "Zero Point" or free energy.

8. Our physical body is changing as we approach Zero Point. Our DNA is being "upgraded" to 12 strand. A new light body is being created. We are becoming more intuitive.

9. The Mayan Calendar predicted all the changes that are occurring now. They say we are going beyond technology and back to the natural cycles of nature and the Universe. By 2012 we will have entered the 5th Dimension (after the flip to the 4th Dimension at Zero Point).

10. Be prepared for changes that will bring in the new age of light. We are going beyond time where fear based concepts are totally dissolved.

Future well tell
